NOTE: Use warm soapy water and a soft damp cloth to keep the glass clean. Wipe dry with a clean cloth. Scourers, abrasives and chemical cleaners can damage the glass and pattern, and should not be used. In hard water areas, insoluble lime salts may be deposited on the glass. If this is allowed to build up it becomes increasingly difficult to remove and looks unsightly. Regular cleaning will minimize this effect.

- Do not attempt to cut the glass.
- Do not strike the glass with hard or pointed items.
- Regularly check moving parts such as rollers and hinges to ensure they are secure and adjusted correctly. Tighten and adjust where required. Also check all sealed joints to ensure seal has not deteriorated. Re-seal if required.

FR

REMARQUE : Utilisez de l'eau tiède savonneuse et un chiffon doux humide pour garder la vitre propre. Si nécessaire, vous pouvez utiliser un produit pour vitres. Grattoirs, abrasifs et nettoyants chimiques peuvent endommager la vitre et le motif, et ne doivent ainsi pas être utilisés. Dans les zones dont l'eau est dure, un dépôt de calcaire peut se former sur la vitre. Si vous le laissez s'accumuler, il deviendra de plus en plus difficile à enlever, et sera inesthétique. Un nettoyage régulier permet de réduire cet effet.

- Ne tentez pas de découper la vitre.
- Ne cognez pas la vitre avec des objets durs ou pointus.
- Vérifiez régulièrement les pièces mobiles telles que les rouleaux et charnières afin de vous assurer qu'elles sont solidement fixées et correctement réglées. Serrez et ajustez-les lorsque nécessaire. Vérifiez également tous les joints scellés afin de vous assurer de l'intégrité de l'étanchéité. Scellez à nouveau au besoin.

PL

INFORMACJA: Użyj szmatki z ciepłą mydlaną wodą do czyszczenia szyb. Nie należy używać do czyszczenia ostrych zmywaków oraz szorujących lub chemicznych środków czyszczących, ponieważ mogą one uszkodzić szklaną powierzchnię lub wzór na szkle.
W twardej wodzie, nierozpuszczalne sole wapna mogą odkładać się na szybie. Jeśli nagromadzi się ich duża ilość, wówczas stają się one bardzo trudne do usunięcia. Regularne czyszczenie zminimalizuje ten efekt.

- Nie przecinaj szyb.
- Nie uderzaj w szyby twardymi lub spiczastymi przedmiotami.
- Regularnie sprawdzaj ruchome części, takie jak rolki ki i zawiasy, aby upewnić się, że są one bezpieczne i właściwie ustawione. Dokręć i wyreguluj je w razie potrzeby. Dodatkowo sprawdzaj wszystkie uszczelnione złącza, aby upewnić się, że uszczelnienie nie uległo pogorszeniu. Ponownie uszczelnij w razie potrzeby.

RO

NOTA: Utilizaţi apă călduţă cu detergent şi o cârpă moale pentru a menţine geamul curat. Uscaţi ştergând cu o cârpă curată. Bureţii abrazivi, produsele de curăţat abrazive şi chimice pot avaria sticla şi aspectul acesteia, şi nu ar trebui utilizate.
In zone cu apă dură, săruri insolubile de calcar se pot acumula pe sticlă. Dacă acestea sunt lăsate să se depoziteze, aceste acumulări pot deveni extrem de greu de Îndepărtat şi vor arăta neaspectuos. Curăţarea periodică va minimiza acest efect.

- Nu incercati să tăiati sticla.
- Nu loviti sticla cu articole ascutite sau dure.
- Verificaţi periodic piesele mobile precum rotiţele şi balamalele pentru a vă asigura că sunt sigure şi reglate corect. Strângeţi şi ajustaţi unde este nevoie. De asemenea verificaţi toate izolaţiile de etanşeizare pentru a vă asigura că nu sunt deteriorare. Reizolati dacă este nevoie.

ES

NOTA: Use agua jabonosa tibia y un trapo húmedo suave para mantener el vidrio limpio. Seque con un trapo limpio- Las fibras, los limpiadores abrasivos y los químicos pueden dañar el vidrio y el dibujo, por lo que no deben usarse. En zonas de agua dura, las sales insolubles de cal pueden depositarse en el vidrio. Si se permite que se acumulen será cada vez más difícil retirarlas y se verá desagradable. La limpieza regular minimizará este efecto.

- No intente cortar el vidrio.
- No golpee el vidrio con artículos duros o puntiagudos.
- Compruebe con regularidad las partes móviles, como las ruedas y bisagras, para asegurarse de que están correctamente ajustadas. Apriételas y ajústelas cuando sea necesario. Compruebe también las juntas selladas para asegurarse de que el sellado no se ha deteriorado. Vuelva a sellarlo si fuera necesario.

PT

NOTA: Utilize água morna com sabão e um pano macio húmido para manter o vidro limpo. Limpe com um pano seco. Esfregões, substâncias abrasivas e substâncias químicas podem danificar o vidro e o padrão e não devem ser utilizados. Em zonas de água calcária, poderão depositar-se resíduos insolúveis no vidro. Se se forem acumulando, torna-se cada vez mais difícil removê-los e o vidro torna-se inestético. Uma limpeza regular minimiza este efeito.

- Não tente cortar o vidro.
- Não bata no vidro com objetos rígidos ou pontiagudos.
- Verifique regularmente as peças móveis, como os roletes e as dobradiças, para garantir que estão devidamente fixos e ajustados. Aperte e ajuste sempre que necessário. Verifique igualmente se as uniões vedadas não apresentam sinais de deterioração. Vede novamente, se necessário.
